

PROJECT	Credit Card Approval Prediction	TEAM	AI/ML Program
DOCUMENT	Demonstration of Proposed Features	DATE	July 2026

Demonstration of Proposed Features

Demonstrated Capabilities

- Home page displaying the project overview and entry point to the prediction tool
- Application form collecting 15 applicant fields across personal, financial, housing, and contact categories
- Real-time prediction generated by the trained Random Forest model
- Result page clearly indicating "Likely Approved" or "Likely Rejected"
- Verified against a known test-set example: a real applicant record correctly predicted as "Rejected" by the model produced the same result through the web application

Demo Video

A short screen-recording walkthrough of the application (home page -> form submission -> result) is available here:
